SWITCHABLE RATCHET

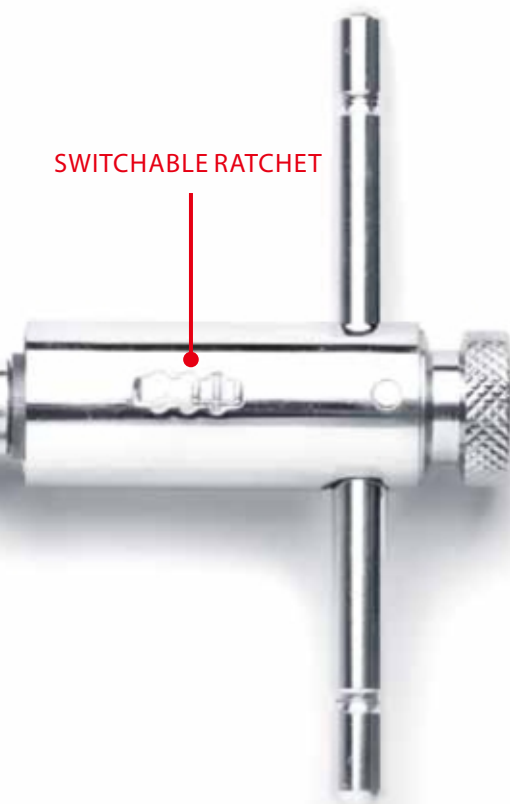

TOOL HOLDER WITH RATCHET  
suitable for taps with square shank

## ► TOOL HOLDERS AND TAP WRENCHES

Tool holders with a switchable ratchet are designed for mounting taps with square shanks into the hardened two-jaw chuck. The body is completely made of steel. Clockwise and counter clock-wise rotation can be set with a slider. The rotary handle can be locked at three positions to meet different working place.

SWITCHABLE RATCHET

EXTRA LENGTH VERSION

### CHUCK

suitable for taps with square shanks according to DIN 10

### ADJUSTABLE TAP WRENCH

The adjustable tap wrench with hardened clamping jaws is made of steel which has knurled steel handles that are unscrewable on one side. It is suitable for taps with square shanks as well as tap extensions. The body is new designed and made from die-casted zinc alloy by heavy duty casting machine.
